**Toe Peg Installation Instructions: Victory**

There are 2 ways to use these toe pegs for a Victory Cross Country or Vision.

- 1) Retap the threads in the pegs to 8M 1.25 threads from the current and almost identical 5/16" diameter bore.
- 2) Drill out the threaded hole in the control arms to 5/16" and get longer bolts to make up for the added Victory control arm thickness compared to H-D.

***NOTE: Regardless of the method you choose,  
secure the bolts with blue thread locking compound  
when installing.***

*Always remember.....*

*Never... never ride faster than your Angel can fly!*
